## LETTER OF RECOMMENDATION

I am very pleased to write a letter of recommendation for Mr. Raga Sai Nikhil to pursue his master's degree in the stream of Computer Science from your renowned University. I have been acquainted with Nikhil for two years now starting January 2021, not only as a colleague but also as a companion outside work. Owing to my interaction with him both professionally and as an ally, I feel proud to be one among few colleagues that are entitled to judge Nikhil as a reliable, supportive, passionate, and energetic person.

With his enthusiasm and commitment towards his job, Nikhil always finds a way to finish the work he has been entrusted with before the deadline. I am a great admirer of his supporting nature. Particularly, when I was assigned a project that I'm oblivious of, Nikhil was always my go to person as he has ample understanding in what he does. Even when he is unaware of the questions that I put forward at him, he always does at least a little bit of research before coming back to me with a response. Never afraid of going one step forward and probably making a mistake while doing so, he is always ready to take constructive criticism and ceaselessly tries to improve himself.

From my conversations with Nikhil outside of the work, I got a chance to know Nikhil him personally. He is very optimistic, gentle, and kindhearted in nature. He is always willing to offer help to his friends and colleagues when they are in need. I can effortlessly say that Nikhil definitely gets a chance to be on the list of very few colleagues that I am grateful to have around in my professional career of 12 years that is still counting.

I do not even have a single reservation in giving Nikhil my highest recommendation for your esteemed University. With his relentless quest for knowledge and ability to tackle the hardest of the problems, he will stand out and make your university proud. I am more than confident that, with his reliability and supportiveness, he will bring the same warmth and insight to his classes and community. You are always welcome to contact me in case of any query regarding Nikhil's character and capability.
