LETTER OF RECOMMENDATION

I am very glad to endorse Mr. Raga Sai Nikhil to pursue his master's degree in the stream of Computer Science from your prestigious University. I have been working with Nikhil for almost 2 years now since January 2021. My interaction with him as his Team Lead has given me adequate scope to describe him as a levelheaded and clear-thinking person.

After accepting the Internship Offer during his 8th semester, he joined VMware as an Intern and within no time, he received a Full Time Offer owing to his consistent performance. During my interaction with him, I have observed his will power and commitment towards his goals. I have always believed fresh under-graduates who just entered the world of corporate, should have hunger for knowledge and be ready to go to great depths in learning new things, and Nikhil is exactly that kind of person. He always keeps himself up to date with the latest developments in the field of Computer Science. Hardly intimidated by them, he has a unique outlook towards complicated situations and has a knack of tackling them tactfully.

From what I have observed during our one-on-one sessions, I can confidently say that he is self-driven and shows a great deal of passion in whatever work he does. I have always noticed coherence and cohesion in his work which makes it easy to understand for others. I have recognized his consistent performance in all the projects that he has worked on under my guidance. I can effortlessly say that he is one among the list of colleagues I feel proud of, that I have met in my long-lasting career, in terms of sincerity, efforts, ability to grasp the concepts and out of the box thinking.

Taking it on a personal note, I am quite certain that Nikhil will perform exceptionally well and prove himself as an asset to your Institute and will reach greater heights in his career. His ability to figure things out from the basic concepts and his analytical thinking approach in solving the problems that comes in his way makes him an ideal contestant for any stream. Considering his enthusiasm in pursuing Masters in the stream of Computer Science, I strongly recommend him to be a part of your esteemed University. Please do not hesitate and feel free to reach out to me in case of any query.
